40     var charGuess = guess.toUpperCase();
41
42     // Iteration & Selection logic
43     for (var i = 0; i < secretWord.length; i++) {
```

This project creates a short game of hangman, I had to use my creativity and knowledge of coding to make it, and it helped me learn how to get creative with my ideas.

This project creates a pixel art image of a rabbit, I had to use my imagination and planning out to get a design, I learned how to overcome challenges, and a challenge I had to overcome was figuring out how to plan out the design to get it to look good.

This project I had to use the Karel coding to create a small image with a partner, I had to use my conversation skills, I learned how to work with other people when creating a project, I had to overcome figuring out a design that worked for me and my partner.
